OUR SERVICE

CUSTOMS CLEARANCE SERVICE

A customs clearance service is a service provided by logistics companies or customs brokers to facilitate the smooth movement of goods across international borders. When goods are imported or exported, they must go through customs clearance procedures to comply with import and export regulations, pay any applicable duties or taxes, and ensure compliance with trade laws.

FREIGHT FORWARDING

Freight forwarding is a crucial component of logistics that involves the transportation of goods from one destination to another on behalf of shippers. Freight forwarders act as intermediaries between shippers (importers or exporters) and carriers (such as shipping lines, airlines, trucking companies, or rail freight operators), coordinating the movement of goods efficiently and cost-effectively.

TRANSPORTATION

Transportation services are a core component of logistics, focusing on the physical movement of goods from one location to another. In logistics, transportation encompasses various modes of transport, including road, rail, air, sea, and multimodal options.

OUR SERVICE

3PL- THIRD PARTY LOGISTICS

Third-party logistics (3PL) services refer to outsourcing logistics and supply chain management functions to a specialized third-party provider. These providers offer a range of services to assist businesses in managing various aspects of their supply chain efficiently.

E-COMMERCE FULFILLMENT

E-commerce fulfillment in logistics refers to the process of fulfilling online orders placed by customers through an e-commerce platform. It involves various logistics operations, including order processing, inventory management, picking and packing, shipping, and returns processing, all tailored to meet the specific needs of e-commerce businesses.

CONSULTING & ADVISORY

Consulting and advisory services in logistics provide expert guidance and strategic support to businesses seeking to optimize their supply chain operations, improve efficiency, reduce costs, and enhance overall performance. These services are typically offered by specialized consulting firms or individual consultants with extensive experience and expertise in logistics and supply chain management.

OUR SERVICE

ON-DEMAND WAREHOUSE SERVICES

On-demand warehousing is an online platform that offers sellers to store their inventory and fulfill orders temporarily with warehouses that have excess space with them. In simpler terms, In on-demand warehousing is outsourcing your order fulfillment to a company that doesn't perform fulfillment services itself but outsources it to others.

SHARED WAREHOUSING SERVICES

Shared warehousing services in logistics involve multiple businesses sharing storage space, equipment, and resources within a single warehouse facility. This arrangement allows companies to reduce costs, optimize space utilization, and benefit from shared amenities and services.

REVERSE LOGISTICS SERVICES

Reverse logistics services involve managing the flow of goods and materials from the point of consumption back to the point of origin or another destination for purposes such as returns, repairs, recycling, or disposal. Unlike traditional logistics, which focus on the forward movement of goods from suppliers to customers, reverse logistics deals with the reverse flow of products back through the supply chain.
